Reviewers: Michael Weintraub, Sibendu Dey, Vaibhav Shehhar Dave

Score: 100

GREAT JOB. The score says it all. Outstanding work to an outstanding team.

Great presentation and team dynamics.

System video is good, although a little repetitious with the build. Well done, although it's just curious the team didn't automatic the push to AWS into Jenkins.

System demo is very good. Appreciate the accelerated typing in the video. Very clear.

The client is the best project client I've seen. It's got a great UX aesthetic.

Nice push to the finish.

From the reflection, the team was honest and direct. The client expectations were big, yes, but there was never any actual list of required work. The team owned that. However, there appears to be a miscommunication, and I will work to avoid repeating this in the future.
